Leslie Milburn 15th August 1985

Gidday Les,

Thank you for your letter. Please excuse the slight delay in replying. I was determined to have the enclosed Newsletter completed so that I could send you a copy. As you can imagine it was a Herculean task getting it all down on tape. The VeeZed gremlin is almost bound to have hidden a few errors, but I think I've found them all except the spelling of "doesn't" on the last page.

A brief history of this club is that when the VZ-200 was new there was no software support from magazines and the Dick Smith Programs were pretty poor. The situation is better now, but the real fascination of the VeeZed is rollin' one's own.

Most advertised VeeZed Clubs simply produced newsletters listing programs for sale. So, to cater for those who wanted something more practical we began this club and ran it FREE.

We did soon learn that many VeeZed owners soon put their little beepers back into their boxes and lost interest. Those whose interest has turned into an addiction continue to write and exchange tapes.

As you will see from the enclosed MICRO MAGIC we are now offering to support new VeeZedders by supplying a Beginner's Guide to the VeeZed. The Guide, MICRO MAGIC, does not assume previous knowledge of BASIC, nor is it a wordy repeat of the Basic Reference Manual. Each of the 6 issues will contain programs with mobs of notes to explain lines and sub-routines. We hope the enclosed Newsletter will convey this to you, Les.

Looking forward to hearing from you again real soon.

Happy BEEPING !!!

Gordon
